## Lead Service Line Inventory

### Water Main Construction History

Past water main construction projects were compiled to determine any supplier side reinstallations that are copper. Hardcopy design plans and record drawings were found from 1995-2013 to update the Village's data.

#### 1995

Albion Ave 8" (Crawford to Christiana)

#### 1996

Touhy Ave 16" (Lincoln to Tripp), Tripp Ave 16" (Touhy to Lunt), Lunt Ave 16" (Tripp to Crawford), Lamon Ave 8" (Chase to Jarvis), Ionia Ave 8" (Central to Spokane)

#### 1997

Pratt Ave 8" (Central to Ramona), Ionia Ave 8" (Spokane to Leroy), LaPorte Ave 8" (Pratt to Tower Circle Dr), Tower Circle Dr 8" (LaPorte to Longmeadow), Kilpatrick Ave 8" (Pratt to Lunt), Knox Ave 8" (Pratt to Lunt), Kenton Ave 8" (Pratt to Lunt), Kolmar Ave 8" (Pratt to Lunt), Morse Ave 8" (~Kostner to Tripp in parkway)

#### 1998

Minnehaha Ave 8" (Ionia to Sauganash), Spokane Ave 8" (Ionia to Sauganash), Nokomis Ave 8" (Ionia to Sauganash), Navajo Ave 8" (Ionia to Sauganash), Le Mai Ave 8" (Ionia to Sauganash), Devon Ave 8" (Kilbourn to railroad crossings/Valley Line Trail), Lincoln Ave 12" (Harding to Keeler)

#### 1999

Longmeadow Ave 8" (Sauganash to Pratt & cul de sacs), Kilpatrick Ave 8" (Touhy to Chase), Kostner Ave 8" (Pratt to cul de sac), Kenneth Ave 8" (Pratt – cul de sac, Morse to Lunt), Cherry Ln 6" (Morse to cul de sac)

#### 2000

Kedvale Ave 8" (Lunt to Touhy), Columbia Ave 8" (Kimball to Spaulding), Lawndale Ave 8" (North Shore to Pratt)

## Lead Service Line Inventory

### 2001

Loyola Ave 8" (Crawford to Proesel), Hamlin Ave 12" (Pratt to Lunt)

### 2007

Cicero Ave 12"/16" (Touhy to Jarvis), Chase Ave 16" (Cicero to Lincoln), Lincoln Ave 16" (Chase to Touhy), Jarlath Ave 8" (End to Cicero), Sauganash Ave 8" (Central to Navajo), Railroad easement/UP Trail 8" (Wallen & North Shore), Arthur Ave 8" (Ridgeway to Lincoln), Drake Ave 8" (Devon to Pratt), Devon Ave 8" (Lincoln to Christiana)

### 2009

Morse Ave 12" (Hamlin to End), Northeast Parkway 12" (~3401 to McCormick), McCormick Blvd 12" (Pratt to Lunt)

### 2010

Pratt Ave 12" (Monticello to McCormick), Ridgeway Ave 12" (Lunt to Touhy), Touhy Ave 12" (Ridgeway to Capitol Dr)

### 2013

Crawford Ave 12" (Devon to Jarvis)

## Lead Service Line Inventory

As of August 2020, the Village began receiving drinking water from the City of Evanston after the completion of a transmission main project. Evanston receives water from Lake Michigan and adds blended phosphate during the water treatment process to prevent corrosion of lead service lines.

### **Village of Lincolnwood Community Water Supply Identification Number: IL0311650**

In total, the Village of Lincolnwood has 4,258 water service lines, including residential and commercial services. Although the Final Lead Service Line Inventory has not been completed yet, there are 1,054 identified lead service lines and 534 unknown water service lines that are suspected as lead. Lead service lines are typically in houses that were built between 1930-1960 and have not undergone any remodeling. The Village maintains a copy of the most recently submitted material inventory on its website.

### Water Line Material Survey

In 2023, the Village's consulting engineers, Christopher B. Burke Engineering Ltd. (CBBEL), created a web portal for a water line material survey. The Village distributed multiple letters to residents with unknown water service line materials and encouraged them to complete the survey. The survey required homeowners to provide a picture of the water service line connection inside the house for a Village employee to verify the material type. If the Village employee could not determine the material type from the picture sent by the homeowner, a Water System Operator conducts a site visit to identify the material type. Once the material type is confirmed, the material type is updated in the Village's Geographic Information System (GIS) database. To date, 125 addresses have completed the survey.

### Water Line Inspections

The Village's Water Division has two Water System Operators and one Water Foreman performing water service line inspections, as needed, to assist in completing the water service line material inventory. It became apparent that homeowners generally do not know where their water service line came into the house and the Water Division was able to identify the material type for them and update the Village's material type in GIS. To date, the Water Division has performed more than 120 water service line inspections.

### Permitting Records

Permit records were obtained to determine which houses have received new water services due to new construction or new water service installations. A few addresses will be undergoing demolition in 2024

for homeowners to obtain a larger lot which has been noted in the table below since there is no longer an active water service line.

<b>Address</b>	<b>Permit Type</b>	<b>Year</b>

## Lead Service Line Replacement Plan

The Village’s Lead Service Line Replacement Plan will be published on the Village website. Residents are welcome to contact staff about any questions or concerns regarding the plan.

Since 2020, a total of 48 lead service lines have been replaced by the Village or homeowners. In 2024, 35 addresses are estimated to have lead service lines replaced as part of the 2024 Infrastructure Plan construction. The table below breaks down the number of lead service lines that have been replaced by year.

In 2023, the Village had to make an emergency repair at 6656 N Sauganash Avenue and the lead service line was replaced with a type k copper pipe from the water main to the connection inside the house. Funds will be budgeted every fiscal year to account for any emergency repairs that the Village must make.

<b>Year</b>	<b>Replaced By</b>	<b>Number</b>	<b>Total</b>
<b>2020</b>			<b>5</b>

## Lead Service Line Replacement Plan

### 2023 Lead Service Line Replacement

As part of the 2023 Infrastructure Plan, which included water main replacement and road resurfacing, lead service line replacements were also completed. Prior to construction, it was estimated that there were 25 lead service lines to be replaced as part of the project. After gaining entry into the houses and inspecting the connection inside the house, the number of lead service lines was reduced to 21.

The costs, including construction and interior restoration, for lead service line replacements, were estimated to be \$368,000. Funds for lead service line replacements were obtained through the Village's Water Fund.

The project was bid out as a unit price contract and the lowest bidder was Millennium Contracting. The contractor's bid prices are below.

Items	Unit	Total Quantity	Unit Price	Total
Water Service Line (Private) – Lead Service Replacement, 1”	Each	26	\$3,883.00	\$100,958.00
Water Service Replacement with New Buffalo Box, Long Side, 1”	Each	20	\$3,883.00	\$77,660.00
Water Service Replacement with New Buffalo Box, Short Side, 1”	Each	16	\$3,666.00	\$58,656.00
Water Service Line (Private) – Lead Service Replacement, 1.5”	Each	1	\$4,500.00	\$4,500.00
Water Service Replacement with New Buffalo Box, Long Side, 1.5”	Each	1	\$3,800.00	\$4,250.00
Water Service Replacement with New Buffalo Box, Short Side, 1.5”	Each	1	\$856.00	\$3,800.00
Water Service Interior Restoration	Each	26	\$856.00	\$22,256.00
Residential Water Pit Remove and Replace	Each	36	\$1,000.00	\$36,000.00
Video Taping (Interior and Exterior)	L. Sum	1	\$8,000.00	\$8,000.00

**Table 3: 2023 Infrastructure Lead Service Line Replacement Costs**

The total contract amount awarded to Millennium Contracting Co. was \$1,081,656.00. Lead service line replacements and interior restoration totaled \$316,080.00 or approximately 30 percent of the total project cost.

Lead service lines were replaced from the water main to the connection inside the house to the shutoff valve. The addresses with lead service line replacements in the 2023 Infrastructure Plan are noted in the table below.

<b>Address</b>	<b>Supplier Side Material Pre-Construction</b>	<b>Customer Side Material Pre-Construction</b>	<b>Supplier Side Material Post-Construction</b>	<b>Customer Side Material Post-Construction</b>

## Lead Service Line Replacement Plan

### 2024 Lead Service Line Replacement

The 2024 Infrastructure Plan includes road resurfacing, water main replacement, sewer replacement, and lead service line replacements. Approximately 35 lead service lines will be replaced and funded by the Village. Nine (9) of the 35 addresses have been unresponsive and the Village has not been able to determine the water service line material. The Village will continue to attempt to verify the material type, however, a partial lead service line replacement will be completed for the supplier side if the customer side is still unknown at the time of lead service line replacement construction.

The Village went out to bid for the water main construction on April 4, 2024, and will be going out to bid for the lead service line replacement construction on April 26, 2024. The costs for lead service line replacements were estimated to be \$275,000. The unit price for a public and private side lead service line replacement is estimated at \$5,500 each. Funds for lead service line replacements were obtained through the Village’s Water Fund. The Village also received Illinois Environmental Protection Agency (IEPA) State Revolving Funds (SRF) for lead service line replacement construction.

Prior to construction, the Village hired Baxter & Woodman to assist in identifying water service line materials as part of the 2024 Infrastructure Plan. Any road being resurfaced would have lead service line replacements completed as well. Photos were taken at the connection inside the house for bid documents to assist the contractor’s estimate their unit price for interior restoration.

The addresses of lead service line replacements in the 2024 Infrastructure Plan are noted in the table below.

<b>Address</b>	<b>Supplier Side Material Pre-Construction</b>	<b>Customer Side Material Pre-Construction</b>	<b>Supplier Side Material Post-Construction</b>	<b>Customer Side Material Post-Construction</b>	<b>Estimated Cost for LSLR</b>
3833 W Jarvis Ave	Copper/Non-Lead Solder	Unknown Material	Copper/Non-Lead Solder	-	\$5,500

## Lead Service Line Replacement Plan

### 2025 Lead Service Line Replacement

The 2025 Infrastructure Plan includes road resurfacing, water main replacement, and lead service line replacements. Approximately 153 lead service lines will be replaced and funded at the expense of the Village.

Devon Avenue is also being resurfaced in 2025 as part of the Devon Streetscape Project that is funded by the Surface Transportation Program. The project involves revitalizing the Devon Avenue corridor from Lincoln Avenue to McCormick Boulevard. Brick pavers will be installed in the parkways, trees will be planted, the medians will be landscaped, and new light poles will be installed. Any known lead service lines in the project area will be replaced prior to construction. There are five (5) addresses that have known lead service lines in the project area, and they are for commercial buildings. These lead service line replacements will be budgeted as part of the Devon Streetscape Project.

Pratt Avenue is being resurfaced in 2025 as part of the Pratt Avenue Bike Lanes Project. Lead service lines will not be replaced on Pratt Avenue at this time due to limited funds and planning. These addresses will be replaced in approximately 10 years when the asphalt pavement has deteriorated. The Village will budget for these replacements in the future. Estimated costs for replacement, accounting for inflation, are approximately \$841,500 for the replacement of 71 lead service lines in 2035.

The Village will be hiring a consulting engineer to assist in identifying water service line materials as part of the 2025 Infrastructure Plan. Any road being resurfaced would have lead service line replacements completed as well. Photos will be taken at the connection inside the house for bid documents and specifications.

The addresses of lead service line replacements in the 2025 Infrastructure Plan are noted in the table below. The unit price for a public lead service line replacement construction is estimated at \$5,750 and a private lead service line replacement construction is estimated at \$5,750 as well. Compared to 2024 Infrastructure, inflation was estimated at three percent and then the cost was rounded up to achieve a unit price of \$5,750. Based on the table below, the estimated cost of construction for lead service line replacements is \$1,293,750.

<b>Address</b>	<b>Supplier Side Material Pre-Construction</b>	<b>Customer Side Material Pre-Construction</b>	<b>Estimated Cost for LSLR</b>
3301 W Pratt Ave	Unknown Material	Unknown Material	\$16,500 in 2035

#### PAVEMENT RECONSTRUCTION/RESURFACING YEAR

## Lead Service Line Replacement Plan

### 2026 Lead Service Line Replacement

The 2026 Infrastructure Plan includes road resurfacing, water main replacement, and lead service line replacements. Approximately 106 lead service lines will be replaced and funded at the expense of the Village.

The addresses of lead service line replacements in the 2026 Infrastructure Plan are noted in the table below. The unit price for a public lead service line replacement construction is estimated at \$6,000 and a private lead service line replacement construction is estimated at \$6,000 as well. Compared to 2025 Infrastructure, inflation was estimated at three percent and then the cost was rounded up to achieve a unit price of \$6,000. From the table below, the estimated cost of construction for lead service line replacements is \$1,026,000.

<b>Address</b>	<b>Supplier Side Material Pre-Construction</b>	<b>Customer Side Material Pre-Construction</b>	<b>Estimated Cost for LSLR</b>

## Lead Service Line Replacement Plan

### 2027 Lead Service Line Replacement

The 2027 Infrastructure Plan includes road resurfacing, water main replacement, and lead service line replacements. Approximately 167 lead service lines will be replaced and funded at the expense of the Village.

The addresses of lead service line replacements in the 2027 Infrastructure Plan are noted in the table below. The unit price for a public lead service line replacement construction is estimated at \$6,250 and a private lead service line replacement construction is estimated at \$6,250 as well. Compared to 2026 Infrastructure, inflation was estimated at three percent and then the cost was rounded up to achieve a unit price of \$6,250. From the table below, the estimated cost of construction for lead service line replacements is \$1,543,750.

## Lead Service Line Replacement Plan

### 2028 Lead Service Line Replacement

The 2028 Infrastructure Plan includes road resurfacing, water main replacement, and lead service line replacements. Approximately 209 lead service lines will be replaced and funded at the expense of the Village.

The addresses of lead service line replacements in the 2028 Infrastructure Plan are noted in the table below. The unit price for a public lead service line replacement construction is estimated at \$6,500 and a private lead service line replacement construction is estimated at \$6,500 as well. Compared to 2027 Infrastructure, inflation was estimated at three percent and then the cost was rounded up to achieve a unit price of \$6,500. The estimated cost of construction for lead service line replacements is \$1,833,000.

## Lead Service Line Replacement Plan

### 2029 Lead Service Line Replacement

The 2029 Infrastructure Plan includes road resurfacing, water main replacement, and lead service line replacements. Approximately 187 lead service lines will be replaced and funded at the expense of the Village.

The addresses of lead service line replacements in the 2029 Infrastructure Plan are noted in the table below. The unit price for a public lead service line replacement construction is estimated at \$6,750 and a private lead service line replacement construction is estimated at \$6,750 as well. Compared to 2028 Infrastructure, inflation was estimated at three percent and then the cost was rounded up to achieve a unit price of \$6,750. From the table below, the estimated cost of construction for lead service line replacements is \$1,964,250.

## Lead Service Line Replacement Plan

### 2019 Infrastructure Plan Lead Service Line Addresses

The 2019 Infrastructure Plan included water main replacement and road resurfacing. There are approximately 71 addresses with lead service lines that need to be replaced. The addresses with lead service lines will be replaced as part of the 2025 Infrastructure Plan.

<b>Address</b>	<b>Supplier Side Material Pre-Construction</b>	<b>Customer Side Material Pre-Construction</b>	<b>Estimated Cost for LSLR</b>

#### PAVEMENT RECONSTRUCTION/RESURFACING YEAR

## Lead Service Line Replacement Plan

### 2022 Infrastructure Plan Lead Service Line Addresses

The 2022 Infrastructure Plan included water main replacement and road resurfacing. There are approximately 129 addresses with lead service lines that need to be replaced. The addresses with lead service lines will be replaced as part of the 2028 Infrastructure Plan.

<b>Address</b>	<b>Supplier Side Material Pre-Construction</b>	<b>Customer Side Material Pre-Construction</b>	<b>Estimated Cost for LSLR</b>

**Table 14: 2022 Lead Service Line Replacement Addresses**

# VILLAGE OF LINCOLNWOOD

COOK COUNTY, ILLINOIS

## 10 YEAR INFRASTRUCTURE PLAN FY:2022/2023 IMPROVEMENTS

## Lead Service Line Replacement Plan

### IDOT/CCDOH & Miscellaneous Lead Service Line Addresses

Illinois Department of Transportation and Cook County Department of Transportation and Highways routes in Lincolnwood were not incorporated into the 10 Year Infrastructure Plan for resurfacing. These addresses have not yet been incorporated into a lead service line replacement plan as part of the Infrastructure Plan. Lead service line addresses on Cicero Avenue, Crawford Avenue, Devon Avenue, Lincoln Avenue, and Touhy Avenue will be replaced as part of the 2029 Infrastructure construction.

There are a few streets in the Village that are privately owned and not on the 10 Year Infrastructure Plan for resurfacing or any type of Infrastructure work. This includes Cherry Lane and some parts of Chase Avenue. There are 3 addresses with lead service lines on Cherry Lane and one unknown water service line material. These four addresses have been included in the table below for replacement. Central Avenue was not on the schedule for road resurfacing in the 10 Year Infrastructure Plan and any lead service lines on those streets will have to be phased into the lead service line replacement plan.

<b>Address</b>	<b>Supplier Side Material Pre-Construction</b>	<b>Customer Side Material Pre-Construction</b>	<b>Estimated Cost of LSLR</b>
6735 N Central Ave	Lead	Copper/Non-Lead Solder	\$6,750

## Lead Service Line Replacement Plan

### Replacement Plan Goals

The Village’s lead service line inventory and replacement plan will be made available to the public and published on the Village website. Educational materials such as a Frequently Asked Questions document has been published on the website since 2023.

High risk facilities such as preschools, day care centers, group day care homes, parks, playgrounds, and hospitals have had their water service material identified. There are 13 parks in the Village with 12 parks having a drinking fountain near the playground. The table below lists all high-risk facilities in the Village and their locations.

<b>Address</b>	<b>Facility Name</b>	<b>Facility Type</b>	<b>Water Service Line Material</b>
3462 W Devon Ave	Bais Chaim Dovid	Synagogue	Copper/Copper
3501 Northeast Pkwy	The Carrington	Retirement Community	Copper/Copper

- High Risk Areas

## Lead Service Line Replacement Plan

### 1-Year Goals

The Village intends to replace approximately 35 lead service lines in the 2024 Infrastructure Plan.

### 5-Year Goals

The Village intends to have replaced approximately 1,517 lead service lines from 2024 to 2029.

### 10-Year Goals

The Village intends to have replaced approximately 1,517 lead service lines from 2024 to 2034.

### 15-Year Goals

The Village intends to have all known lead services lines replaced at this time. The remaining lead service lines from the Pratt Avenue Bike Lane Project will be replaced in 2035.

### 20-Year Goals

The Village intends to have all known lead services lines replaced at this time.

### 25-Year Goals

The Village intends to have all known lead services lines replaced at this time.

### 30-Year Goals

The Village intends to have all known lead services lines replaced at this time.

## Lead Service Line Replacement Funding

The Village's Water Fund will be used to fund the Lead Service Line Replacement Construction. The Village will be funding the entire construction, including interior restoration. Therefore, there will be no need for structured payments between the utility and its customers over time.

The approximate cost to replace lead service lines is below:

### Lead Service Line Replacement by Year

- 2024 - \$275,000
- 2025 - \$1,868,750
- 2026 - \$2,226,000
- 2027 - \$3,143,750
- 2028 - \$3,061,500
- 2029 - \$2,872,250
- 2035 - \$841,500

**Total = \$14,288,750**

Cost and financing is supported through the Village's water which includes charges for Capital Improvements and a Debt Service Fund. The Capital Improvements charge is a monthly charge of \$3.42 for Capital projects. The Capital Improvements Fund is allocated for projects such as water main replacements and lead service line replacements. The Debt Service Fund charge is calculated quarterly at \$3.70 per 1,000 gallons. This charge is allocated for projects that improve the water distribution system such as water main replacement or distribution main improvements. The funds from the Debt Service Fund would be used to pay the SRF low interest loan. These rates are subject to change in future years depending on the need to increase costs for lead service line replacement construction.

In the 2024 fiscal year, the Village started a lead service line replacement rebate that offers homeowners a 50% match up to \$3,000. A total of \$12,000 budgeted for this rebate program. Partial and full lead service line replacements are eligible for the rebate. The Village intends to allocate more money each year to this rebate program to account for rising costs of construction and materials for lead service line replacements and increase the rebate amount for each homeowner to encourage replacement their lead service line.

# Understanding your Water Bill

## Water and Sewer Fund

As an enterprise fund, the Village's Water and Sewer Fund is created to account for operations that are financed and operated in a manner similar to private business enterprises. The intent is that costs of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges. All activity necessary to provide such services are accounted for in this fund, including administration, operations, maintenance, billing and collection.

**Village tax dollars are not used to pay any of the costs associated with these water and sewer services.**

The Board of Trustees approved and adopted a 10-year Water Rate Study. The purpose of the study was to evaluate both the operational and capital costs being charged to the Water and Sewer Fund over the next 10 years. During the execution of the Transmission Main Construction Contract (when the Village moved from receiving water from Chicago to Evanston), the Village froze water rates until the end of Fiscal Year 2022 (April 30, 2022) to allow for the review of the water and sewer rates to prevent a shortfall in the Water and Sewer Fund. Due to the capital costs in the Water and Sewer Fund, such as the water main replacement program and the mandated lead service line replacement, the Village approved and adopted a 10-year Water Rate Study. As a result, the Village implemented water rate increases over the first three years to ensure the Water and Sewer Fund is sustainable in the future.

## Five Components of a Water Bill

### A typical water bill has five components

#### Water Usage

The basic water user charge is calculated quarterly based on consumption. Each unit is 1,000 gallons of metered water consumption. The current base rate is \$6.34 per unit. Prior to January 1, 2024, this rate was \$6.17 per unit. This represents a 2.8% increase in basic water use charges.

#### Capital Improvements

Each bill includes a monthly charge of \$3.42 which is allocated to fund large Capital projects, such as, water main replacements. Water bills for residential properties are issued quarterly and reflect a charge of \$10.26 for the three-month period. Water bills for commercial properties are issued monthly, therefore they reflect the monthly charge of \$3.42. Prior to January 1, 2024, this rate was \$3.33 per month.

#### Water Meter Fund

Residential properties are charged a water meter fee of \$4.89 quarterly. Commercial properties are charged a water meter fund fee of \$9.78 monthly. These fees are assessed for the use of the Village's water meters. Prior to January 1, 2024, the residential rate associated with this fee was \$4.76 and the commercial rate was \$9.51.

#### Debt Service Fund

The Debt Service Charge is calculated quarterly at \$3.70 per unit. This charge is allocated to pay debts incurred to improve the water delivery system for projects such as new water main replacements. Prior to January 1, 2024, this rate was \$3.60 per unit.

#### Sewer Use

The Sewer user fee is \$1.09 per unit. Funds that are generated from the sewer user charge are utilized for maintenance of the Village's combined sewer system as well as any improvements or repairs that are needed. Prior to January 1, 2024, this rate was \$1.06 per unit.

**Current rates are effective January 1, 2024.**

For additional information, please contact the Lincolnwood Finance Department at (847) 673-1540 or visit [lincolnwoodil.org](http://lincolnwoodil.org).

## Village of Lincolnwood Request for Lead Service Line Replacement Program

The Village has a lead service line replacement program to help property owners replace their lead water service line at their convenience. Covered projects for the program include partial lead service line replacements (from the water meter or buffalo box to the connection inside the building) and full lead service line replacements (from the water main to the connection inside the building). The program provides property owners with a cost-match of 50% of the total project up to a maximum of \$3,000. The costs associated with interior restoration will not be covered in this program. Program funds are limited, and the Village will fulfill requests on a first-come first-served basis.

**A Village employee must confirm that the water service line is lead before applying for a permit. A Village permit must be issued for the work, the work must be performed by a licensed contractor within the Village and all required inspections must be performed. The work must conform to all applicable Village codes and regulations. Rebate forms must be submitted within 90 days of the work being completed. Work performed prior to January 1, 2024 is not eligible for this program.**

## Lead Service Line Replacement Procedures

### Construction Notification & Procedure

The Village will be completing lead service line replacements in accordance with the Lead and Copper Revision Rule guidance. The Village will hand deliver letters to residents affected by the Infrastructure Lead Service Line Replacements. The notifications adhere to the requirements set forth by 141.5(a) explaining consumers may experience a temporary increase in lead levels in their drinking water due to the replacements. The health effects of lead and flushing instructions will be detailed in the letter to residents as well.

Since the Village received SRF, the contractors responsible for lead service line construction will be required to solicit for Disadvantaged Business Enterprise (DBE) program which is designed to encourage diversity in the workforce.

Full lead service line replacements will be completed from the water main to a buffalo box, and from the buffalo box to the connection inside the building at the first shut-off valve. The contractor will install a type K copper service pipe conforming to ASTM B88. Corporation stops shall be flared with a plug valve manufactured by Mueller, Ford, or McDonald. Curb stops shall be flared with a ball valve and Minneapolis pattern manufactured by Mueller, Ford, or McDonald. Service boxes shall be Mueller or equivalent. Open trenching will be used for the installation of short side services and directional boring will be used for long side services. The contractor will install the water service pipe to the building by directional boring. The water service shall be one continuous length. The use of couplings, joints, etc. will not be allowed.

If the contractor is coring through a concrete floor slab, the contractor shall core drill through the concrete floor slab to allow for penetration of the water service pipe. The contractors will exercise caution to prevent damage to the floor slab caused by the coring operation. After work is complete, the cored hole shall be completely sealed with hydraulic cement to prevent water infiltration.

If the contractor is coring through a foundation wall, the contractor will core drill through the basement wall. An exterior pit will be hand excavated. The contractor will core drill the existing foundation wall to allow for the penetration of the water service pipe. The interior and exterior of the cored hole will be completely sealed with hydraulic cement to prevent water infiltration. The contractor will exercise caution to prevent damage to the foundation caused by the coring operation.

In circumstances where a partial lead service line replacement is required, the replacement will be completed from the water main to a buffalo box or water meter, whichever comes first. The contractor will install a type K copper service pipe conforming to ASTM B88. Corporation stops shall be flared with a plug valve manufactured by Mueller, Ford, or McDonald. Curb stops shall be flared with a ball valve and Minneapolis pattern manufactured by Mueller, Ford, or McDonald. Service boxes shall be Mueller or equivalent. Open trenching will be used for the installation of short side services and directional boring will be used for long side services.

If a property owner chooses to replace their private side lead or galvanized service line, the Village intends to replace the supplier side in a timely manner. In the case of an emergency repair on the customer side, the Village will complete the supplier side replacement within 30 days after the completion of the emergency repair or 120 days if necessary due to weather conditions.

## Lead Service Line Replacement Procedures

### Emergency Repair & Notification

In the event of an emergency repair on a lead water service line, the Village will notify the affected building owner to begin the process of replacing the entire service line. If the Village is unable to contact the building owner or in the event the building owner refuses to grant access and permission to replace the full service line, the Village will perform a partial lead service line replacement. The Village will complete the emergency repair in accordance with the steps outlined in the Lead Service Line Replacement and Notification Act (415 ILCS 5/17.12 (ff(1))).

#### Process:

1. Notify the building owner or resident served by the lead service line in writing that a repair has been completed. The following will be included:
  - a. A warning that the work may result in sediment, possibly containing lead, in the building's water supply system due to the repair.
  - b. Information concerning practices for preventing the consumption of any lead in drinking water, including a recommendation to flush water pipes during and after the completion of the repair or replacement work and to clean faucet aerator screens.
  - c. Information regarding the dangers of lead to young children and pregnant women.
2. Provide filters for at least one fixture supplying potable water for consumption. The filter must be ANSI 53 and ANSI 42 certified for the reduction of lead and particulate. The filter must be provided until the remaining portions of the service line have been replaced or a waiver has been issued.
3. Replace the remaining portion of the lead service line within 30 days of the repair, or 120 days in the event of other circumstances that prohibit construction.
4. If a complete repair of a lead service line cannot be completed due to denial by the property owner, the Village will request the affected property owner to sign a waiver denying the replacement of the entire lead service line.
5. The Village will document any remaining lead service line, including any portion on the private side of the property.
