Project Start Date:	March 2026
Estimated Comp. Date:	March 2027
Cites Impacted:	Village of Lincolnwood, City of Chicago
Contract Value:	\$5,462,909.22
Contractors Name and Office Location:	Capitol Cement Co., Inc. 6231 N Pulaski Road Chicago IL 60646

Please provide detailed information in the fields below and include timeline/dates:

Description of Project / Benefits to Motorist:

This project rehabilitates Devon Avenue from Lincoln Avenue to McCormick Boulevard, including resurfacing, new curb and gutter, sidewalk reconstruction, upgraded lighting, parkway enhancements, and water main replacement. These improvements will provide a smoother roadway, improved drainage, better visibility, and enhanced pedestrian safety.

Construction Schedule and Staging:

Construction is scheduled from May to November 2026 and will occur in four stages: water main work, north side improvements, south side improvements, and median/final paving work. Work is sequenced to maintain traffic flow while completing underground utilities, roadway reconstruction, and streetscape features.

Traffic Impact / Businesses and Motorists:

Lanes will remain open in each direction, but motorists should expect lane shifts, reduced widths, and periodic delays. Access to businesses will be maintained, though driveway interruptions may occur during concrete work. Pedestrian accommodation will be maintained through temporary sidewalks and staged construction.

Closures / Ramps or Streets (Include location and duration of closure):

No full roadway closures are anticipated, but short-term sidewalk and driveway closures will be required throughout each stage. Temporary lane closures will occur during this project.
